

Intermediate Dot Net Developer Job Posting

MED e-care Healthcare Solutions Inc. is looking for experienced software developers to join our growing development team. You will be responsible for maintaining and improving one or more tools in a suite of web applications for the health care industry, as well as designing and developing new tools, as we expand our reach into new markets. We're looking for driven, enthusiastic teammates who will take immediate charge of their projects and embrace career growth opportunities.

Required Experience

- 3-5 years of experience as an ASP.NET web application developer using C#;
- 2+ years of experience of cross-browser web UI development using JavaScript with JQuery;
- 2+ years of experience working with MS SQL Server as the database back-end for web applications;

Required Assets

- Fluency in C#, SQL, JavaScript, and HTML/CSS;
- Working knowledge of JQuery, SVN, refactoring tools, performance profiling and optimization tools, and database change management tools;
- Ability and desire to write readable, maintainable, and well-documented code, to optimize poorly performing code, and refactor poorly written code;
- Strong critical thinking, problem-diagnostic, and problem-solving skills with a sense of product ownership and responsibility;
- Excellent written and verbal communication skills.

Nice-to-Have Assets

- A graduate or post-graduate degree in computer science or software engineering;
- Experience in the medical software industry;
- Experience in business requirements gathering and client needs analysis;
- Experience in build, release, and change management.

About MED e-care

MED e-care Healthcare Solutions Inc. is a Toronto-based software development company that serves hundreds of healthcare facilities, across Canada and internationally, providing administrative and clinical software solutions, as well as consulting services. Founded in 2000, MED e-care has grown to be the leading healthcare solutions provider in Canada.
